

Commercial Grade and **Economy Grade** flagpoles differ in wall thickness and butt diameters. Knowledge of local wind conditions will allow architects to choose the appropriate flagpole to fit the design requirements.

Standard Fittings - Commercial Grade

Finial Ball. Fabricated of 14 gauge aluminum with a flush seam and gold or clear anodized finish.

Truck. Cast aluminum revolving, non-fouling type with stainless ball bearings and Delrin sheaves.

Cleats. Two 9" cast aluminum with satin finish. Secured with two 5/16" stainless steel flat head machine screws.

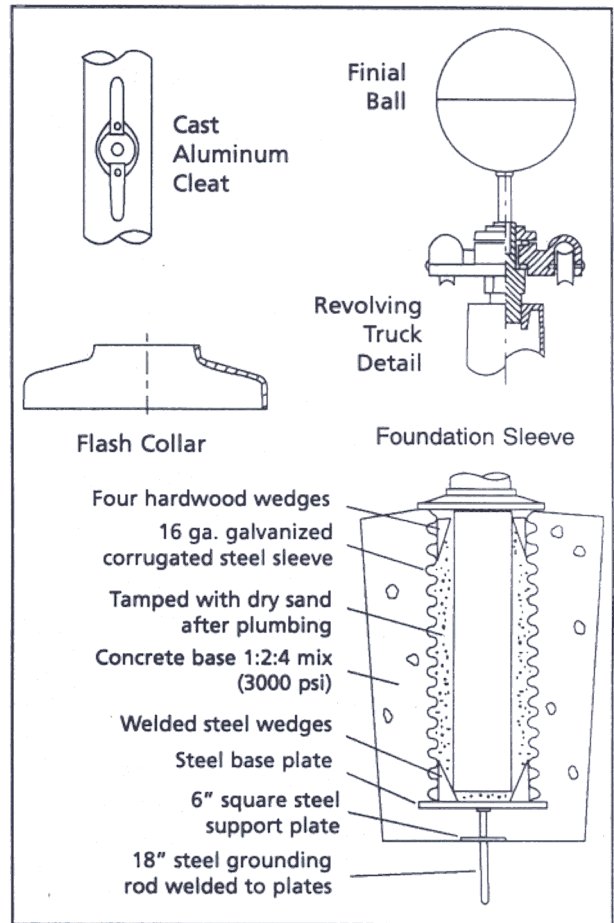

Halyards. Two sets of 5/16" (#10) polypropylene, each with two snap hooks of bronze, chrome-plated brass, or cast nylon. Metal snaphooks are supplied with vinyl protective covers.

Collar. A flash collar of heavy-gauge spun aluminum, with an outside diameter 1" larger than the foundation sleeve. Finished to match the flagpole.

Foundation Sleeve. 16 gauge galvanized corrugated steel tube with a 3/4" dia. lightning ground rod.

Standard Fittings - Economy Grade

Fittings include a revolving non-fouling truck with single sheave and one set of halyards and snap hooks. All other fittings are the same as the Commercial Grade.

Deluxe Flagpoles - External Halyard
